CALYBRATE

System Admin Redesign

Dashboard, Organizations, Requests, Consultants and Reports

System Admin · Laptop and mobile

System Admin: five sidebar pages

Every line is a link. "Contents" at the bottom left of each page brings you back here.

1 **Current screens** — All 10 screenshots you sent, emails and names blurred — p. 03

2 **Dashboard** — Four tiles, recent campaigns — p. 04

3 **Organizations** — List, and the three tabs inside an organization — p. 05

4 **Requests** — Culture requests, approve and reject with confirmation — p. 07

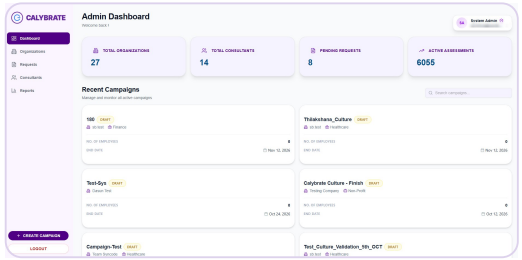

5 **Consultants** — List, add and edit — p. 09

6 **Reports** — Culture Assessment report entry — p. 11

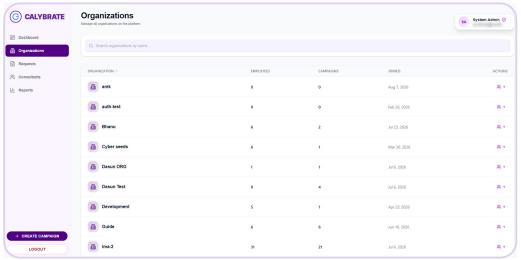

7 **Sidebar plan** — 21 proposed items become 8, with tabs inside — p. 12

8 **New tabs** — Geography, Plans, Team & Security, Settings, Marketing — p. 13

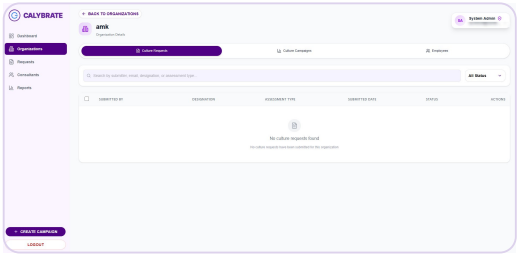

9 **Findings** — What to fix, and open questions — p. 17

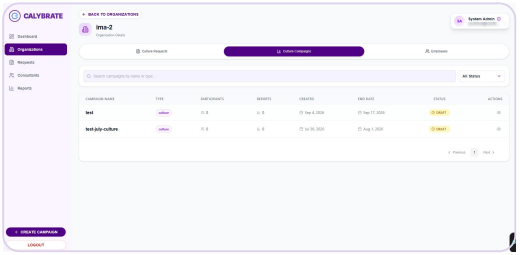

Dashboard

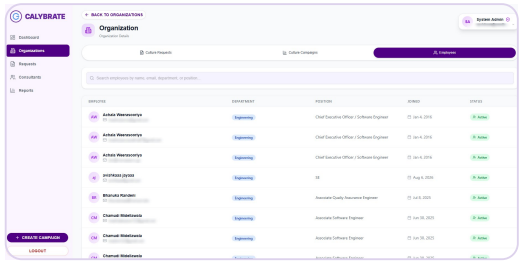

Organizations

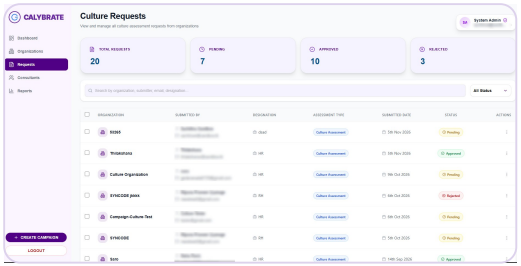

Organization: Culture Requests

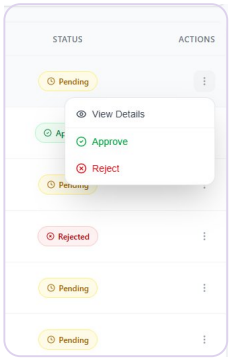

Organization: Culture Campaigns

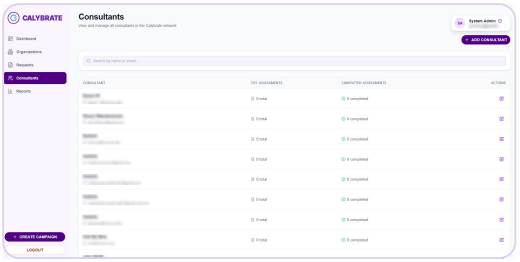

Organization: Employees

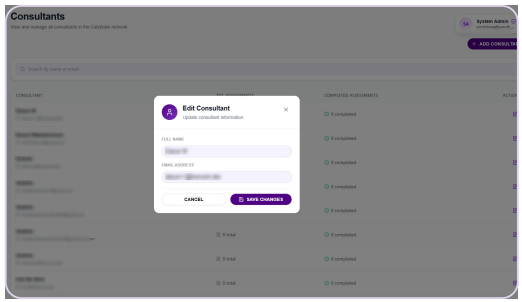

Requests

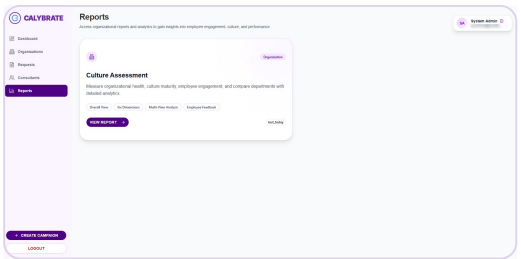

Request actions menu

Consultants

Edit Consultant

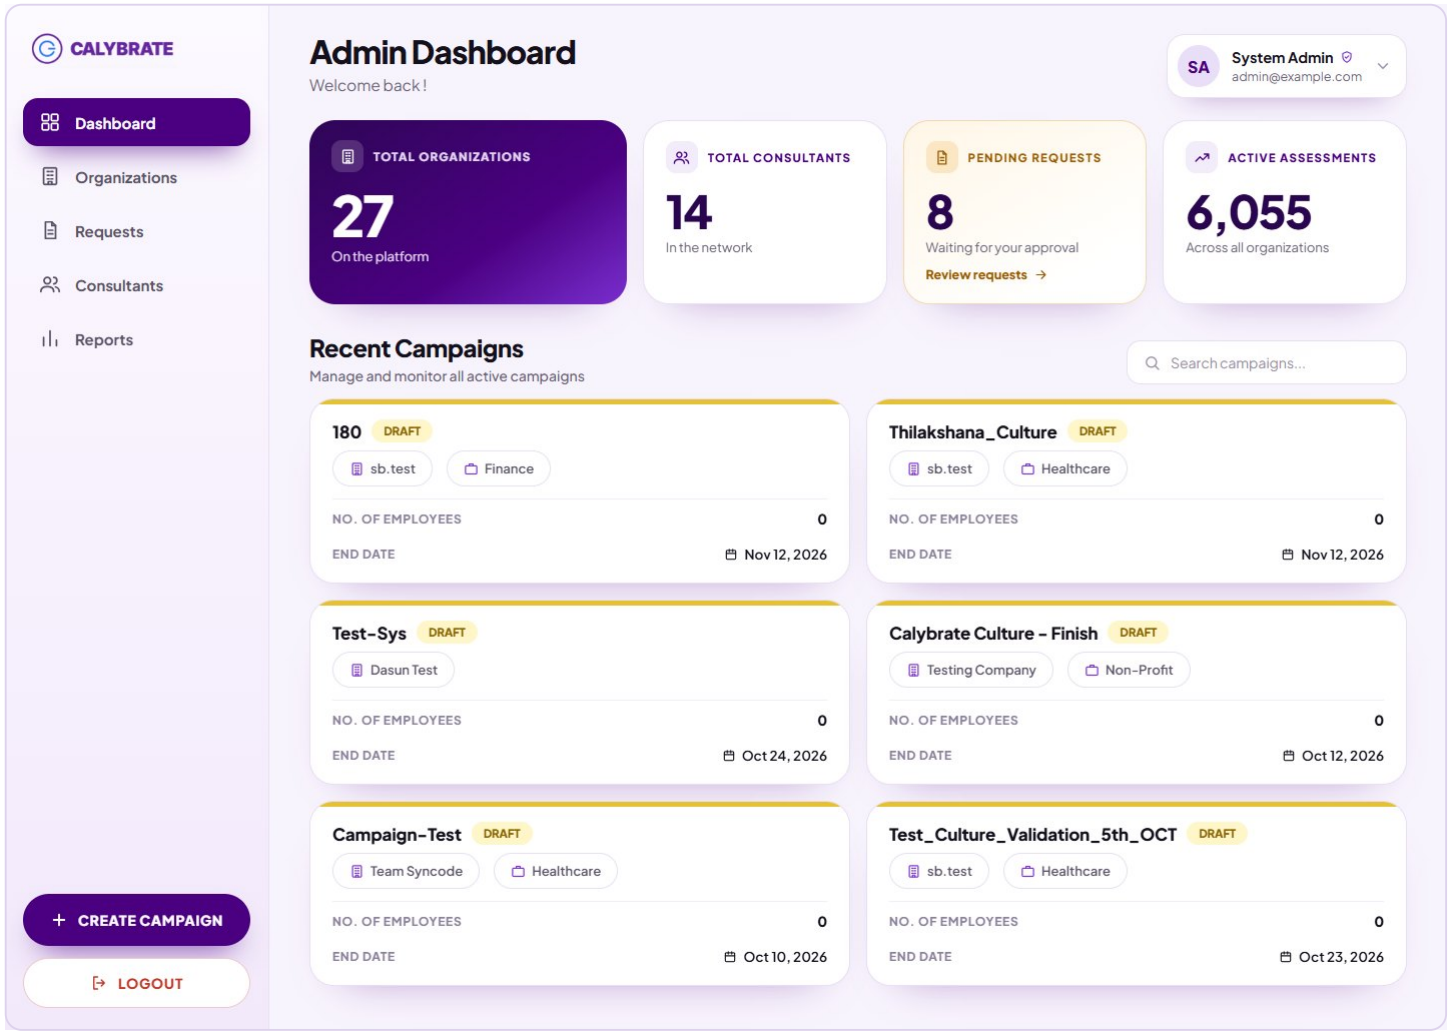

Reports

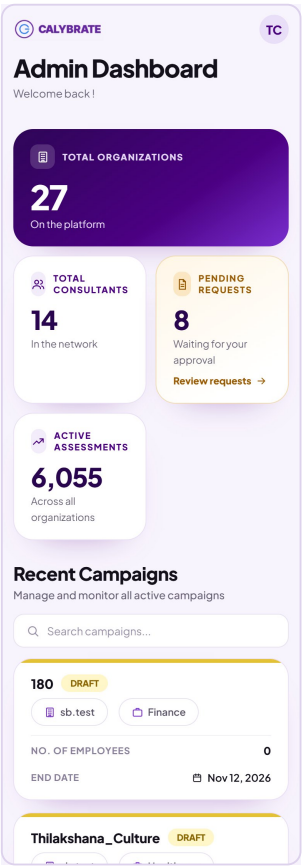

Names and emails are blurred. Counts and organization names are as in your screenshots.

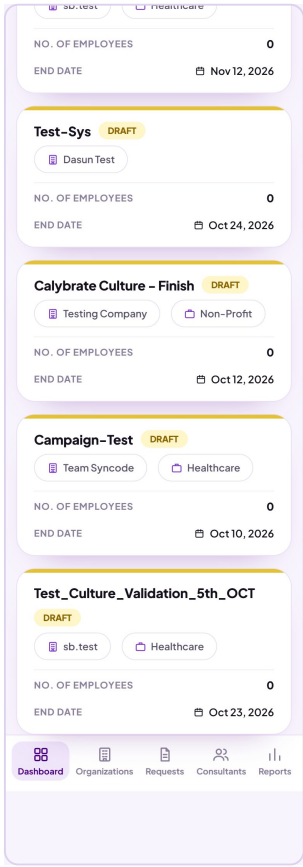

SUGGESTED

LAPTOP

MOBILE

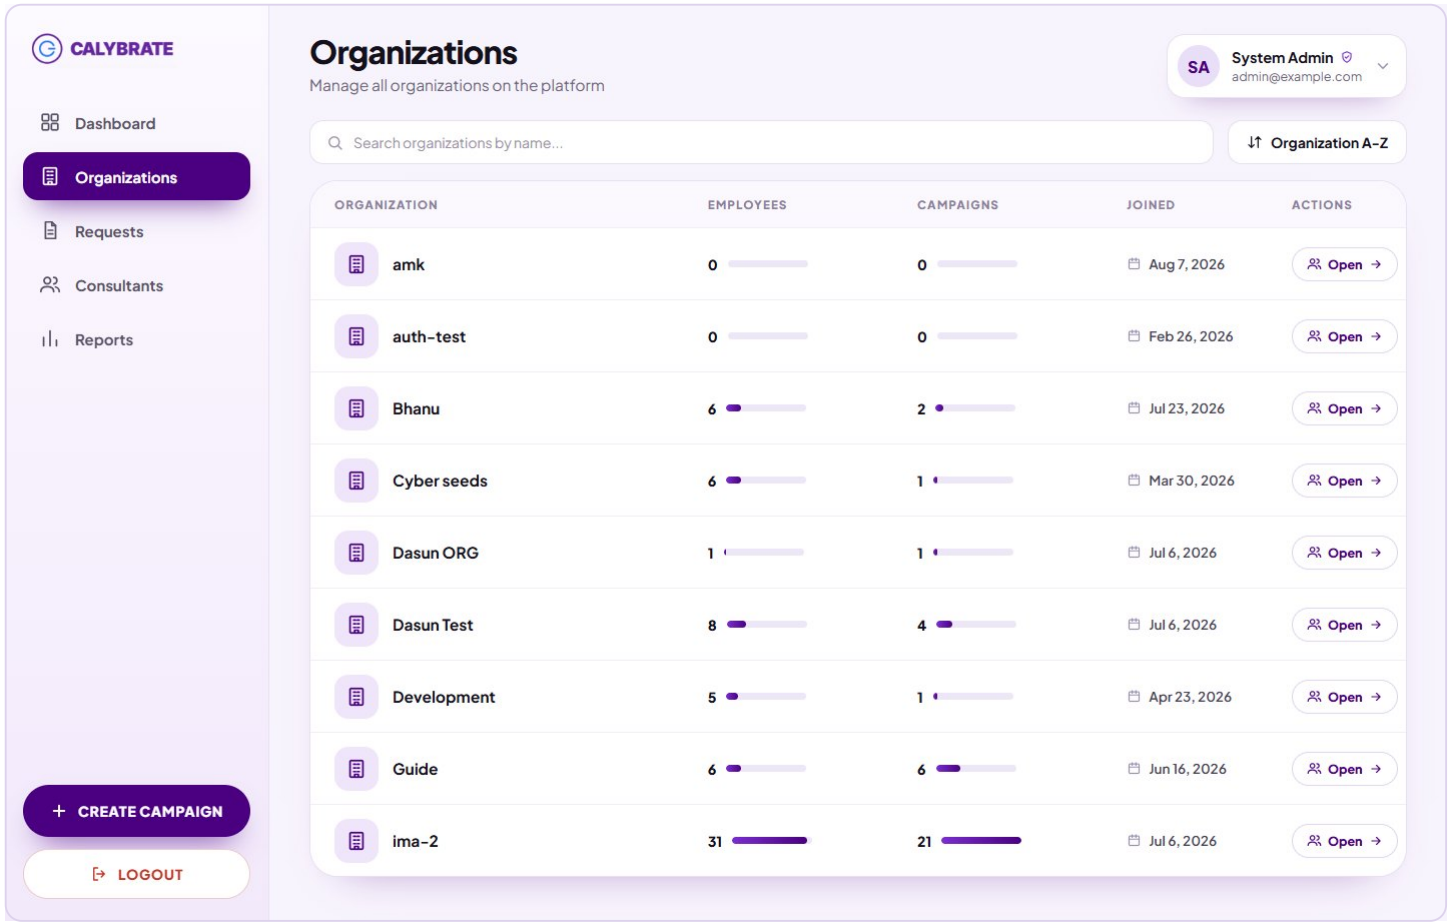

ON SCREEN

1. Tiles count up → 2. Pending tile links to Requests → 3. Cards rise in → 4. Search filters campaigns

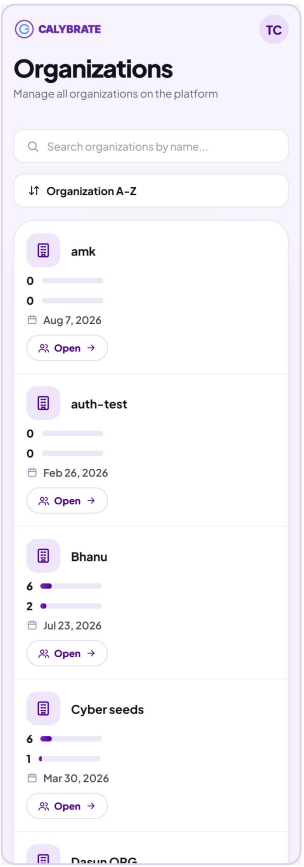

Counts are live (27, 14, 8, 6,055). Campaign names are as in your screenshot; there the status is DRAFT for all six.

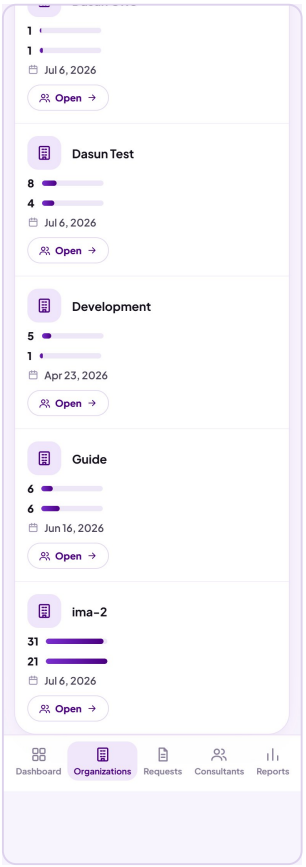

SUGGESTED

LAPTOP

MOBILE

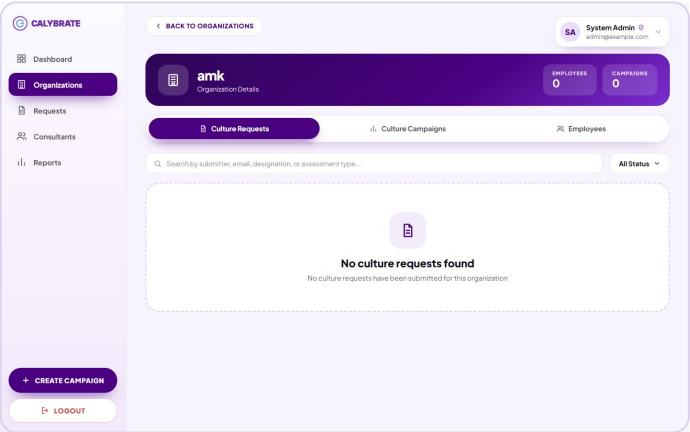

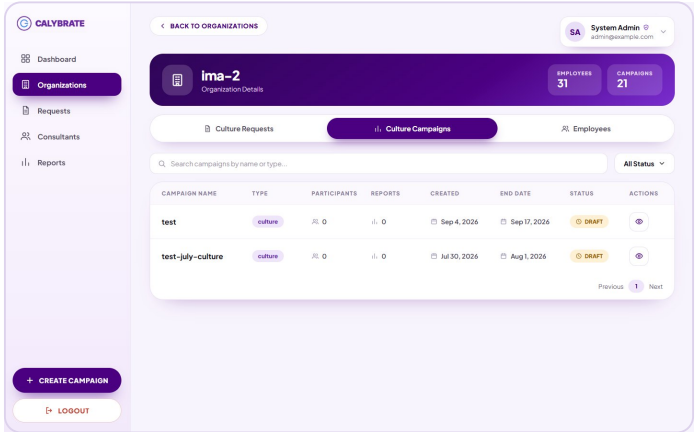

ON SCREEN

1. Search and sort → 2. Mini bars beside the counts → 3. Open goes to the organization

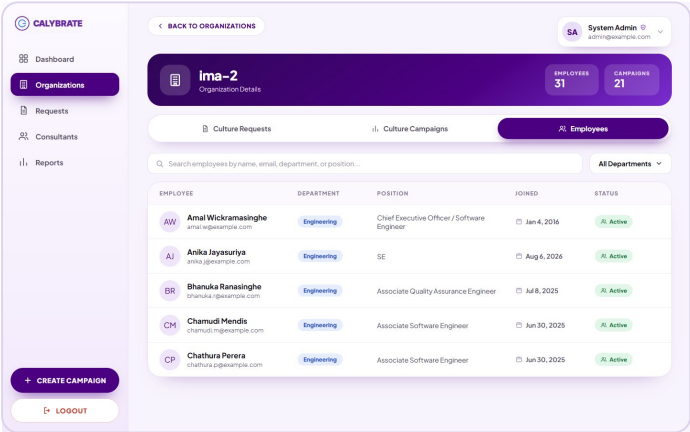

Organization names and counts are as in your screenshot.

1 Culture Requests (empty state)

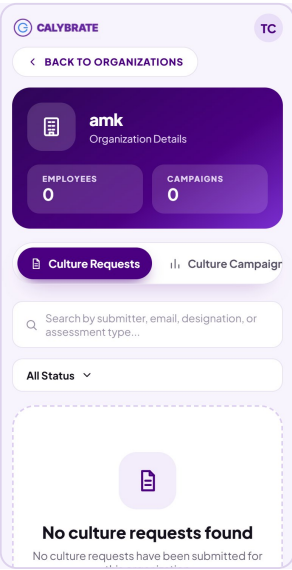

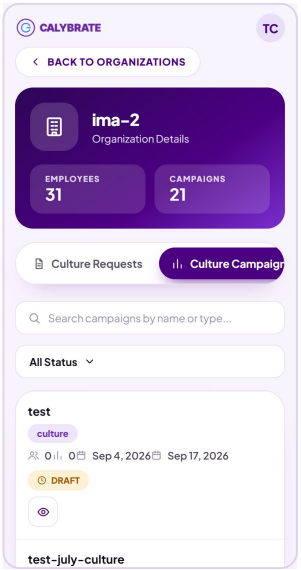

2 Culture Campaigns

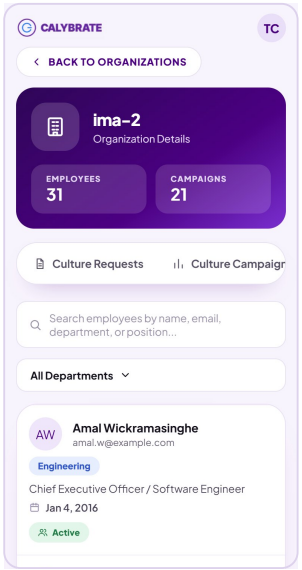

3 Employees

MOBILE

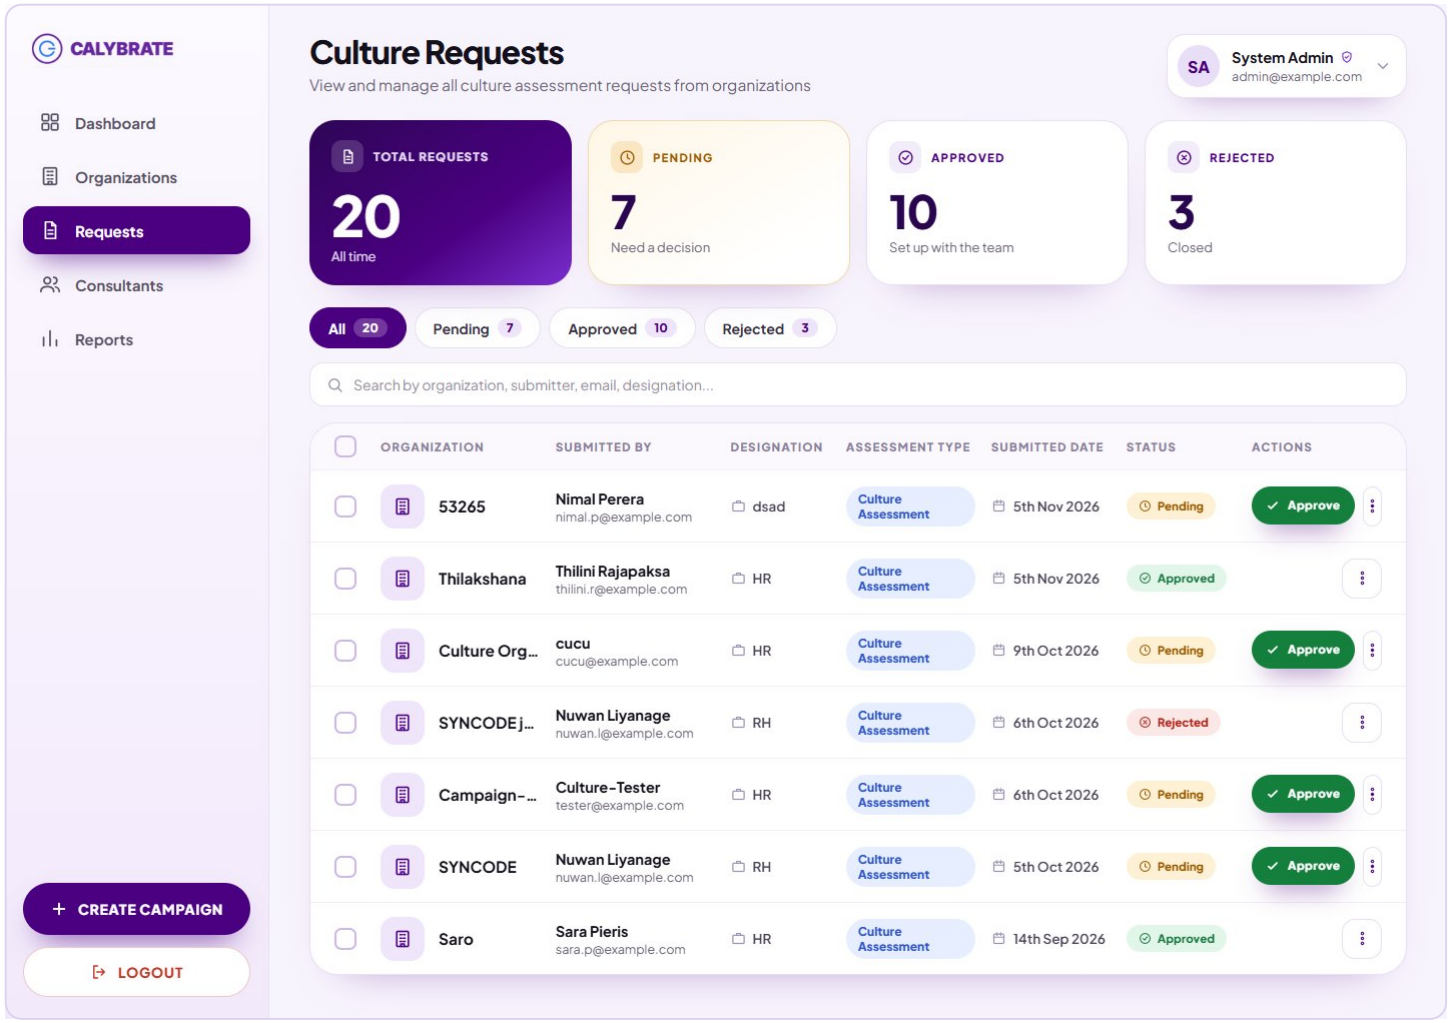

- A purple header shows the organization name with its employee and campaign counts, so the name is always visible (in the live Employees tab the title just says "Organization").
- Three tabs stay in a rounded bar: Culture Requests, Culture Campaigns, Employees.
- The empty state keeps the live text: No culture requests found, No culture requests have been submitted for this organization.
- Campaign rows show type, participants, reports, dates and a DRAFT chip.
- Example employee names and emails replace the real ones.

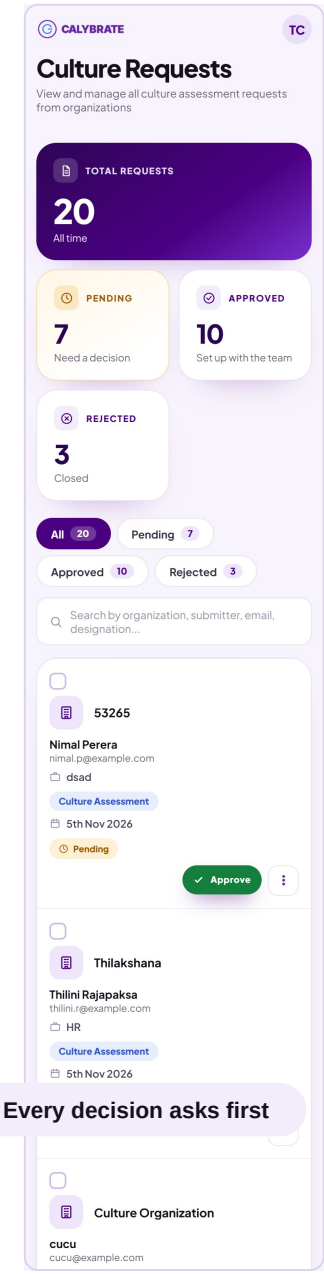

ON SCREEN

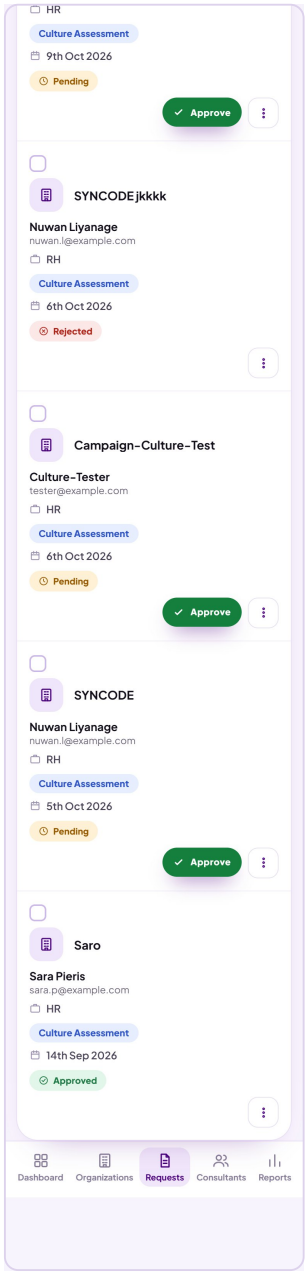

1 Header shows name and counts → 2 Tabs switch the table → 3 Eye opens a campaign

LAPTOP

MOBILE

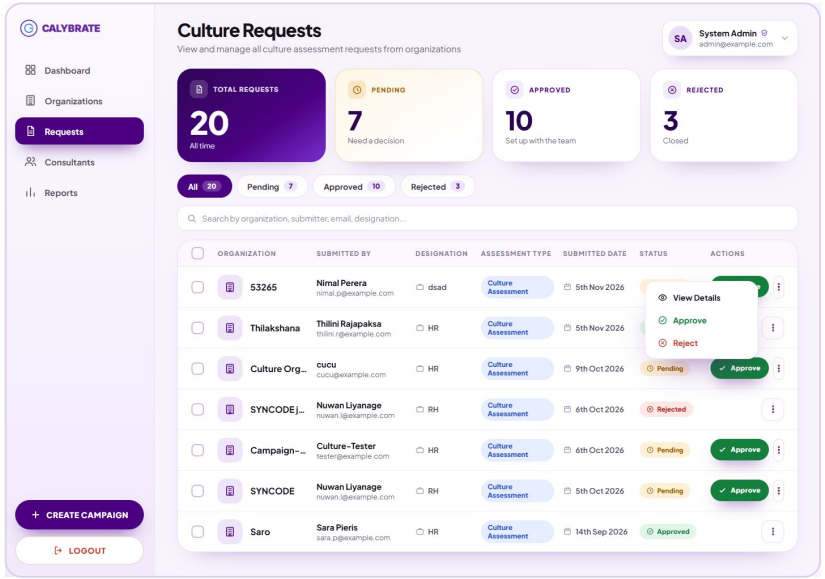

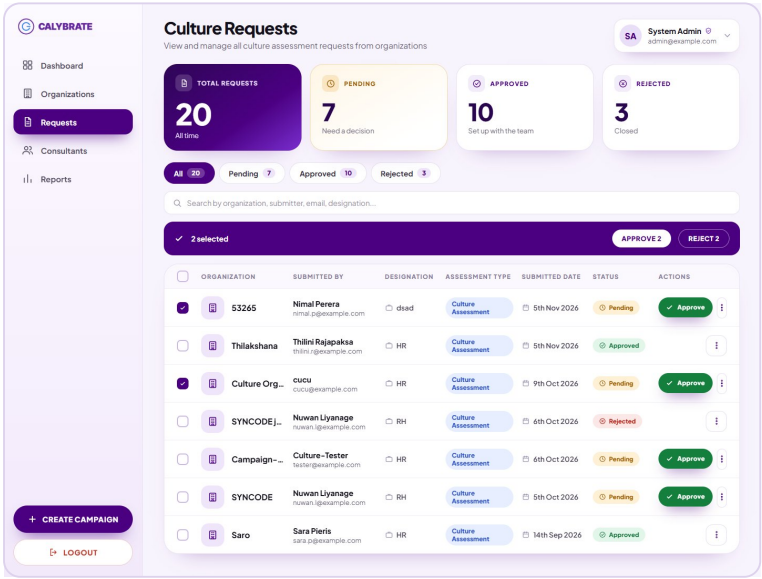

ON SCREEN

1. Status tabs with counts → 2. Approve is a visible button → 3. Menu keeps View, Approve, Reject → 4. Every decision asks first

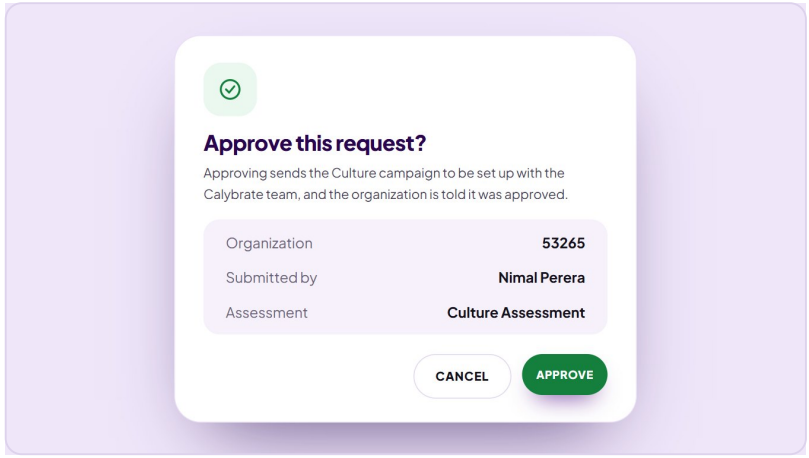

Counts are live (20, 7, 10, 3). Submitters and emails are examples.

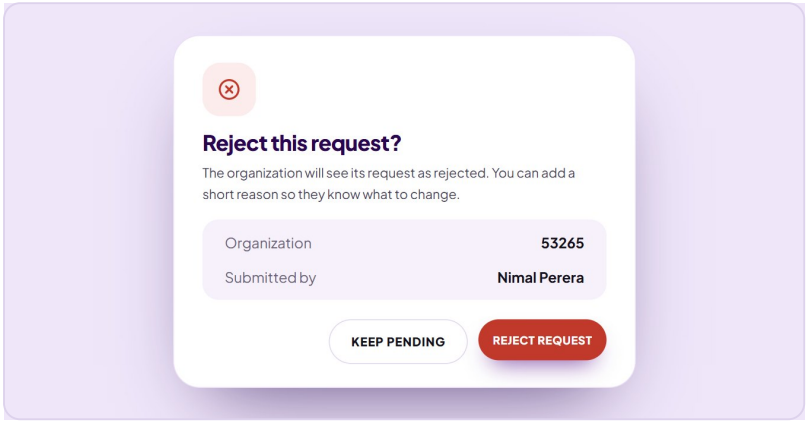

Menu: View Details, Approve, Reject

Select rows: approve or reject several

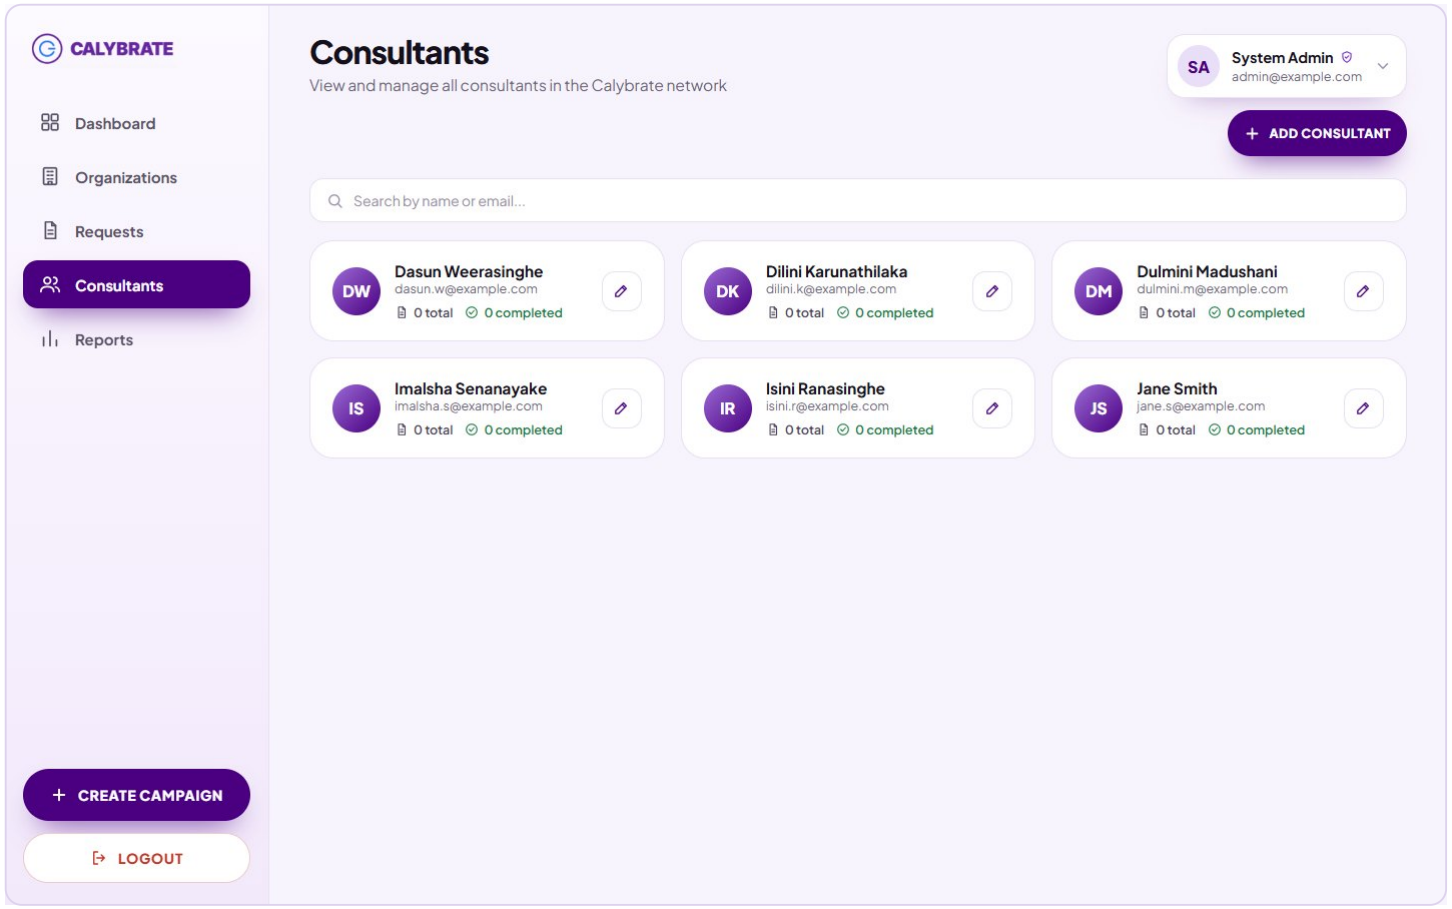

Approve this request?

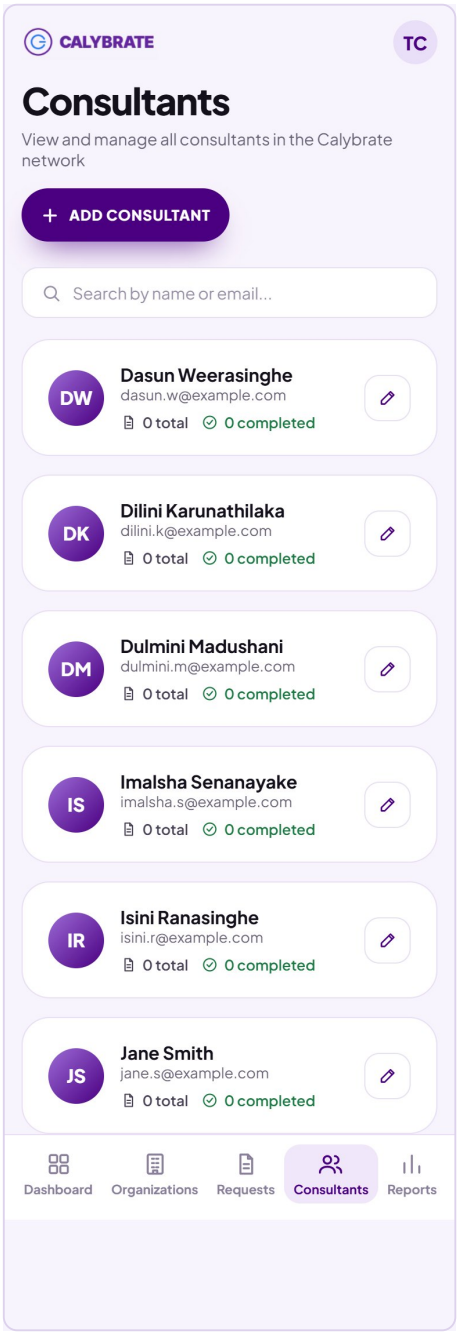

Reject this request?

New: the visible Approve button, row selection with a bulk bar, and the two confirmation popups. All popup wording is new, because the live page decides with no question.

LAPTOP

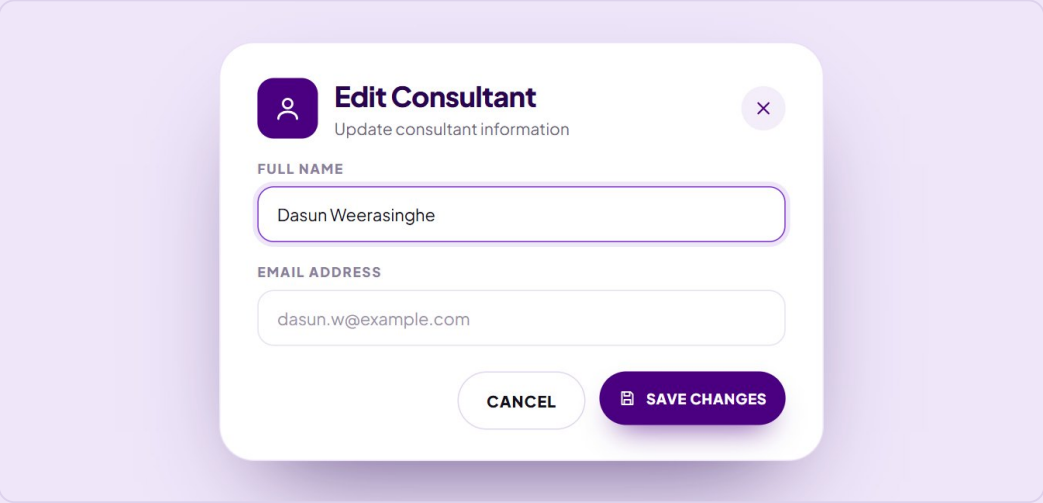

MOBILE

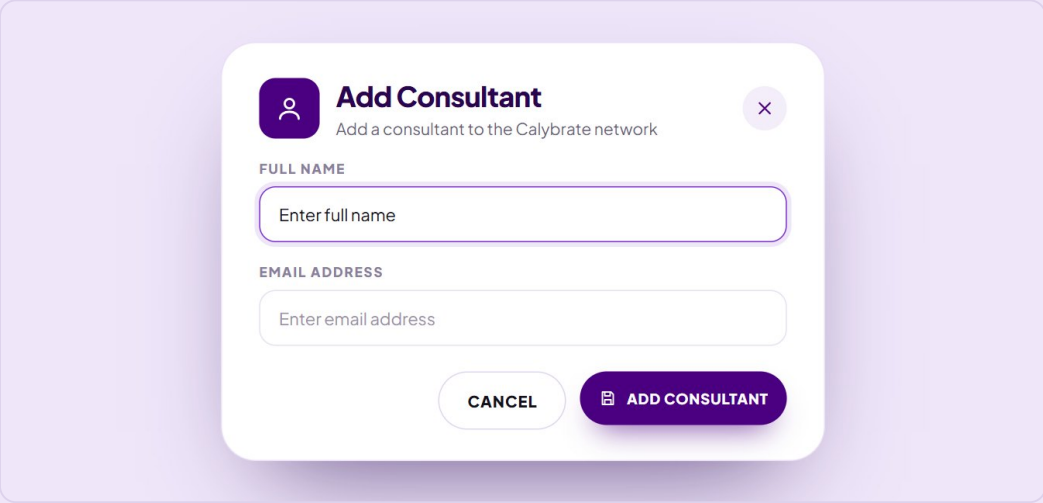

ON SCREEN

1. Cards instead of a long table → 2. Totals shown on each card → 3. Edit opens a dialog

Names and emails are examples; totals are 0, as in your screenshot.

Edit Consultant

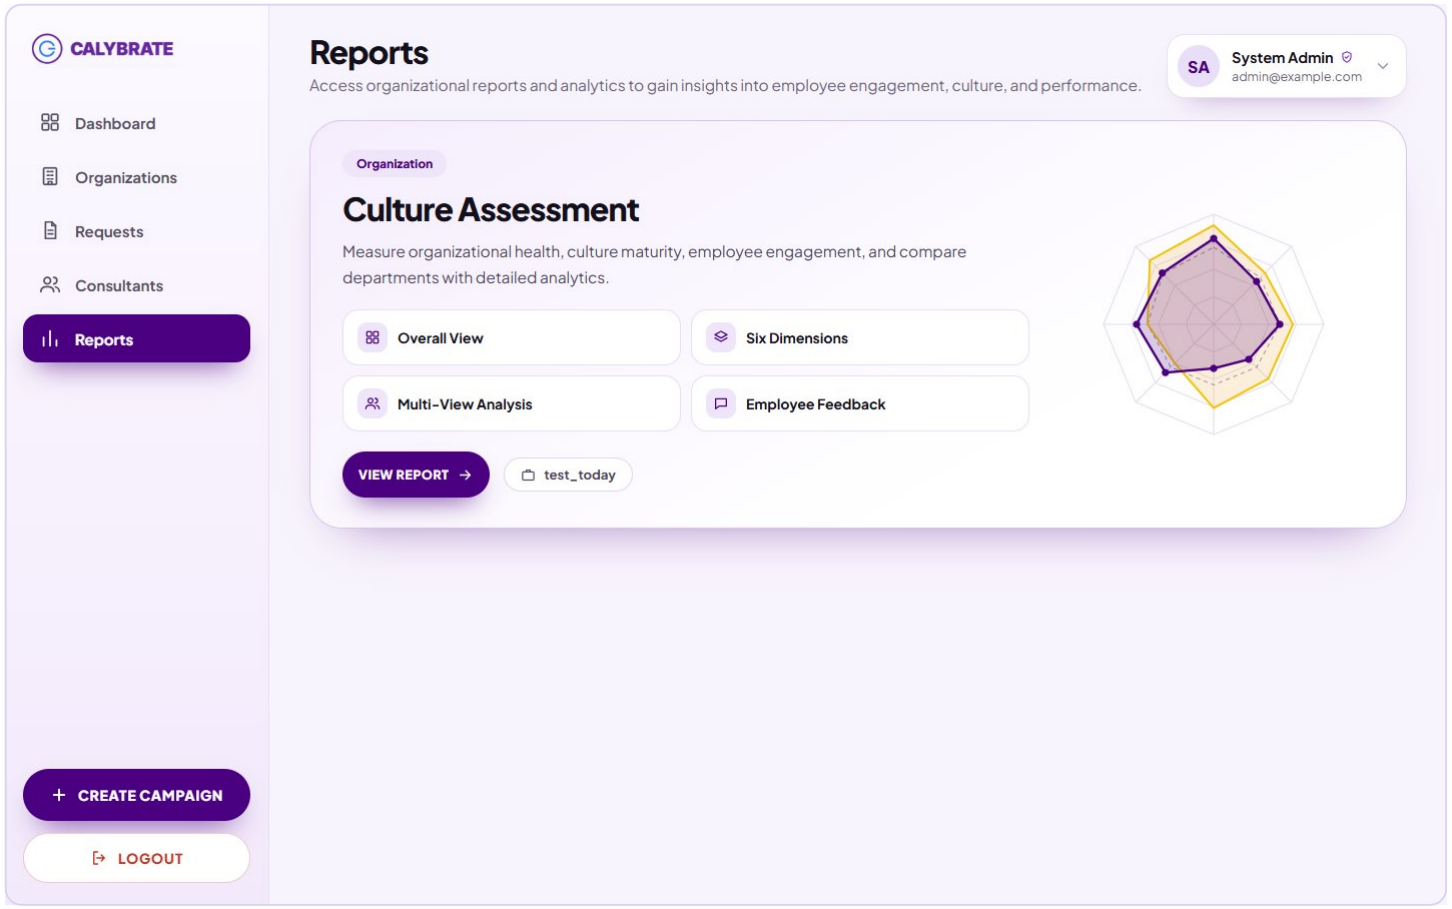

Add Consultant

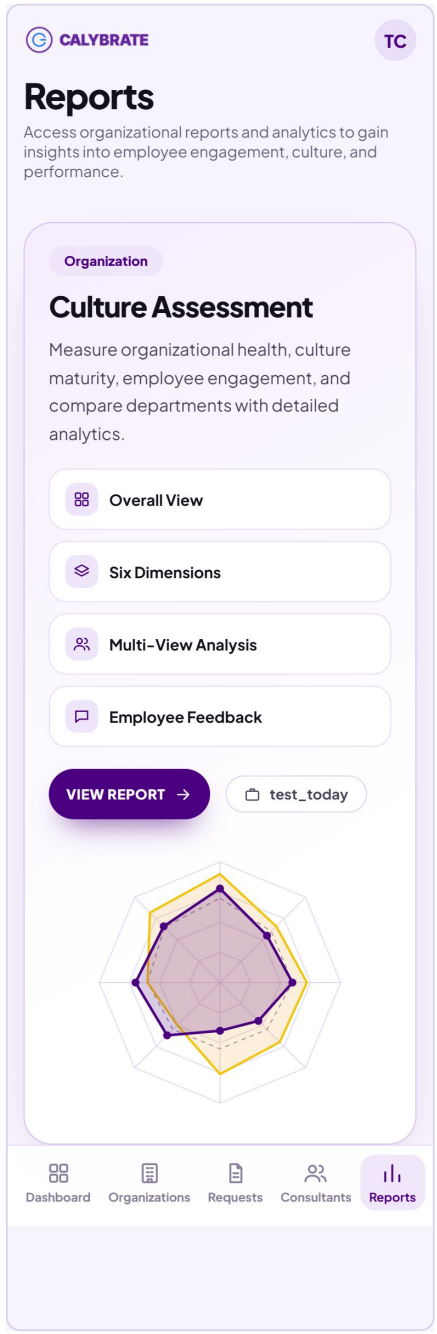

- Edit Consultant keeps the live text (Update consultant information, FULL NAME, EMAIL ADDRESS, CANCEL, SAVE CHANGES).
- Add Consultant uses the same dialog. Its subtitle is new: Add a consultant to the Calybrate network.
- There is no way to remove or deactivate a consultant on the live page; add this if it is needed.

SUGGESTED

LAPTOP

MOBILE

ON SCREEN

1. Card with the four report views → 2. Radar picture → 3. VIEW REPORT opens the report

All text is the live text. The radar is a decorative picture; test_today is the campaign shown on the live card.

SUGGESTED

Keep the sidebar short. Put new features in tabs.

Your prototype lists 5 live pages, 12 proposed pages and 4 social pages in one sidebar. A long list is hard to scan, and most of the new pages belong together. This plan keeps 5 live pages and adds only three groups.

YOUR PROTOTYPE - 21 SIDEBAR ITEMS

Dashboard	LIVE
Organizations	LIVE
Requests	LIVE
Consultants	LIVE
Reports	LIVE
Users by Country	PROPOSED
Admins & Roles	PROPOSED
Sign-in & Access	PROPOSED
Audit Logs	PROPOSED
Privacy & Consent	PROPOSED
Assessment Setup	PROPOSED
Report Access Rules	PROPOSED
Plans & Licensing	PROPOSED
Integrations & Keys	PROPOSED
System Health	PROPOSED
Email Templates	PROPOSED
Support & Feedback	PROPOSED
Social Accounts	SOCIAL
Create Post	SOCIAL
Posts & Schedule	SOCIAL
Social Insights	SOCIAL

SUGGESTED - 8 SIDEBAR ITEMS, EACH WITH TABS

PLATFORM

Dashboard	Overview | Users by Country
Organizations	Organizations | Plans & Licensing
Requests	no tabs
Consultants	no tabs
Reports	Culture Assessment | Report Access Rules

ADMINISTRATION

Team & Security	Admins & Roles | Sign-in & Access | Audit Logs | Privacy & Consent
Settings	Assessment Setup | Email Templates | Integrations & Keys | System Health

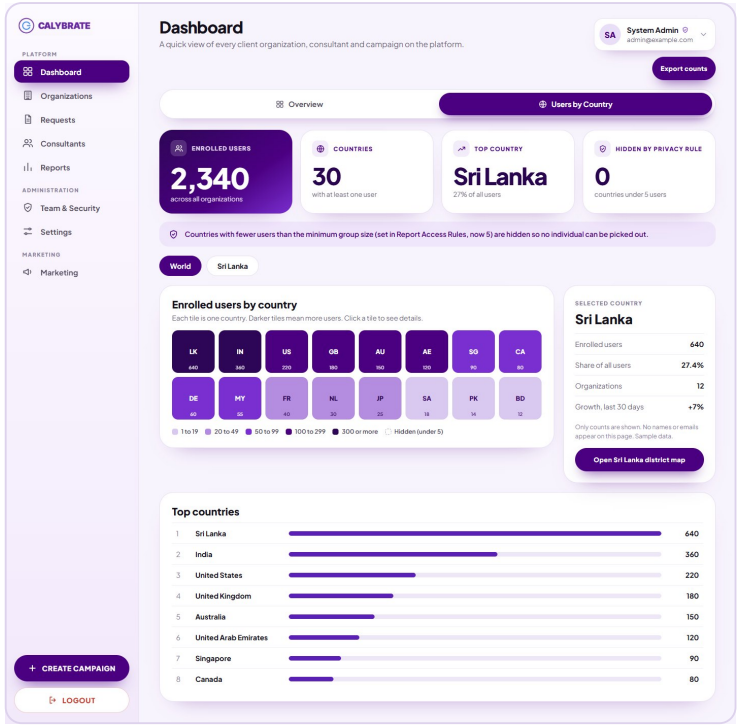

MARKETING

Marketing	Accounts | Create Post | Posts & Schedule | Insights

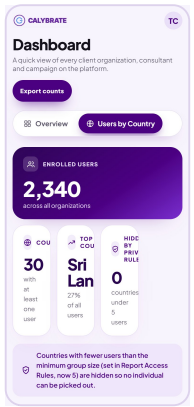

WHERE THE OTHER ITEMS WENT

- Support & Feedback moves into the profile menu (top right), next to Update Password and Log Out.
- Users by Country joins the Dashboard because it is a view of the same counts; Plans & Licensing joins Organizations because each plan belongs to an organization.
- Report Access Rules sits beside Reports, since it sets the minimum group size that hides small groups.
- Social media is for the Calybrate team, not for client organizations, so it has its own group at the bottom (or a separate workspace switch).

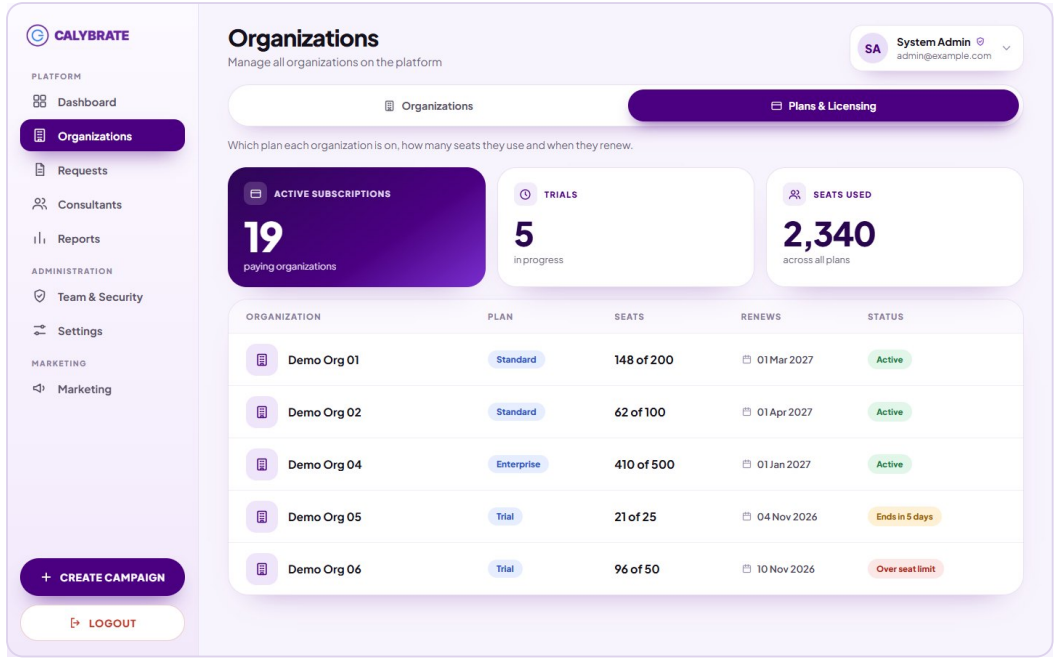

SUGGESTED

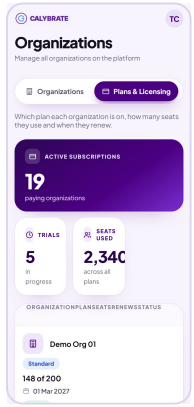

Dashboard: Users by Country (tab 2 of 2)

- Only counts are shown, never names or emails.
- Countries under the minimum group size (5) are hidden.
- The tile map is simplified here; your prototype places tiles by geography.

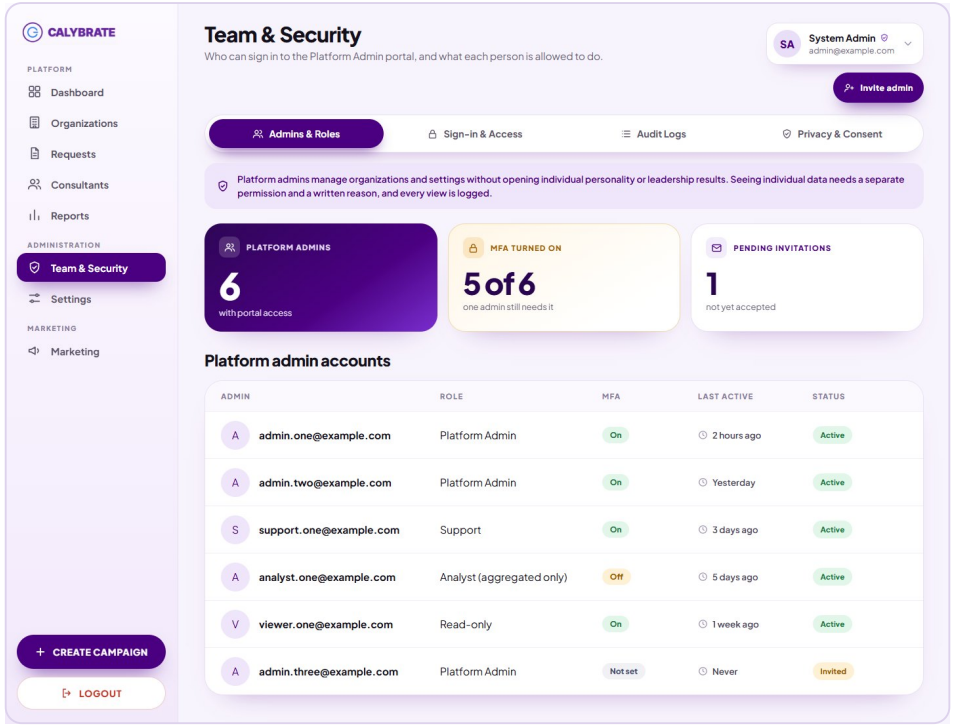

Organizations: Plans & Licensing (tab 2 of 2)

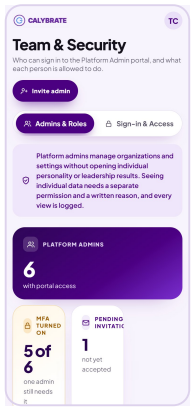

- Plan, seats used out of seats bought, renewal date.
- Status chips warn early: Ends in 5 days, Over seat limit.

ON SCREEN

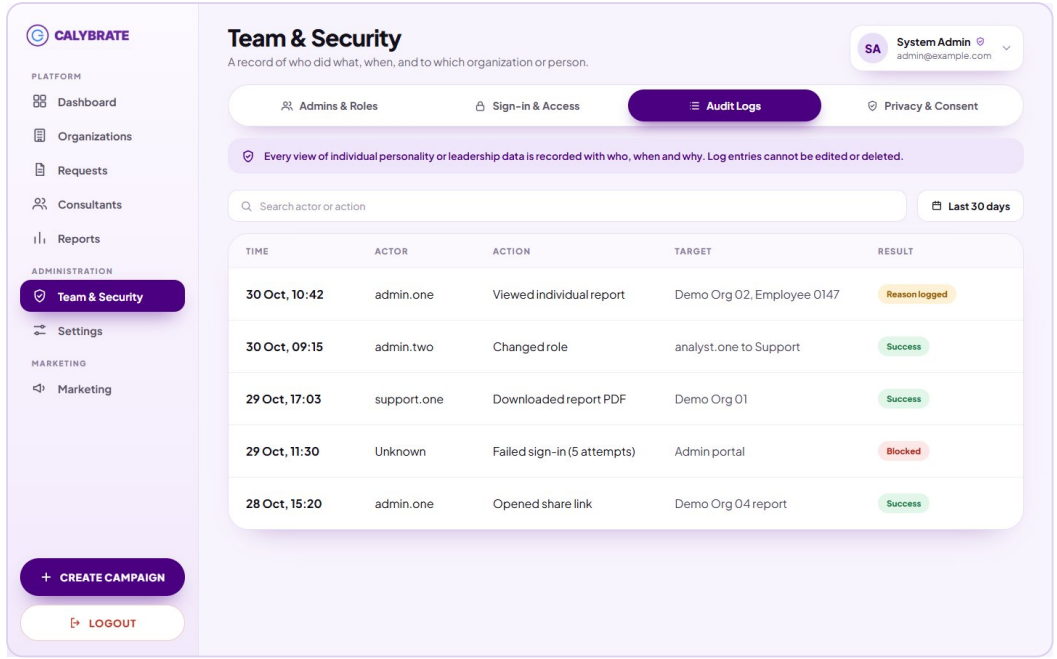

1. Tabs sit under the title → 2. Active tab is purple → 3. Phone: tabs scroll sideways

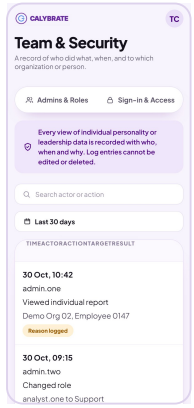

Admins & Roles

- Admin accounts with role, MFA, last active and status.
- One admin still needs MFA: the tile turns amber.
- Sign-in & Access and Privacy & Consent are the other two tabs (screens not provided).

Audit Logs

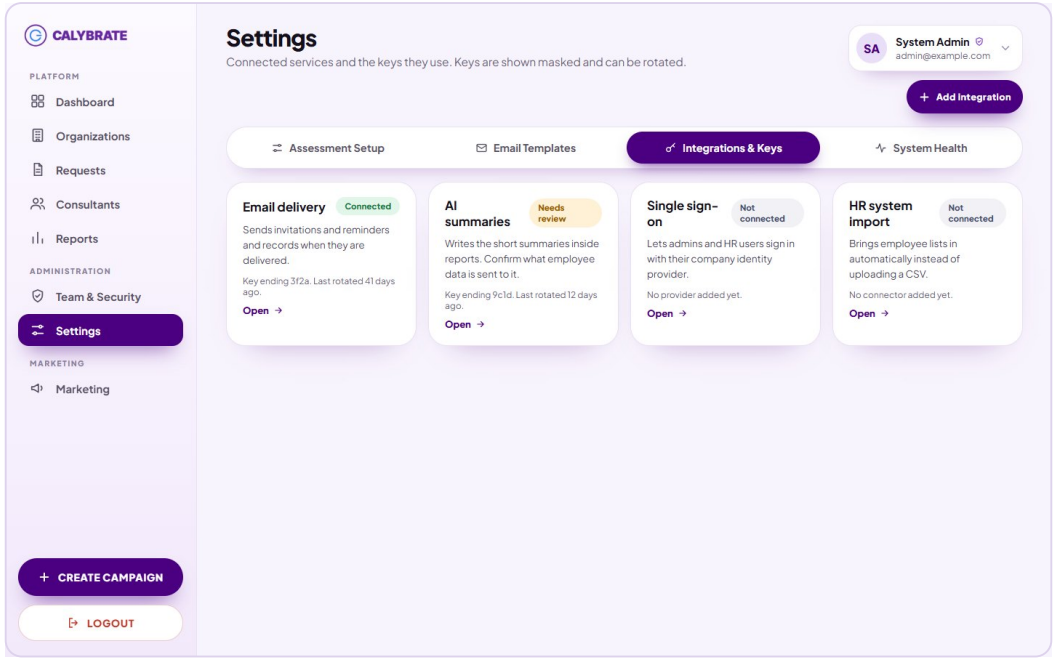

- Who did what, when and to which organization.
- Entries cannot be edited or deleted; failed sign-ins show as Blocked.

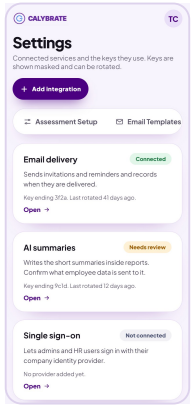

ON SCREEN

1. Four tabs on one page → 2. Search the log → 3. Invite admin stays top right

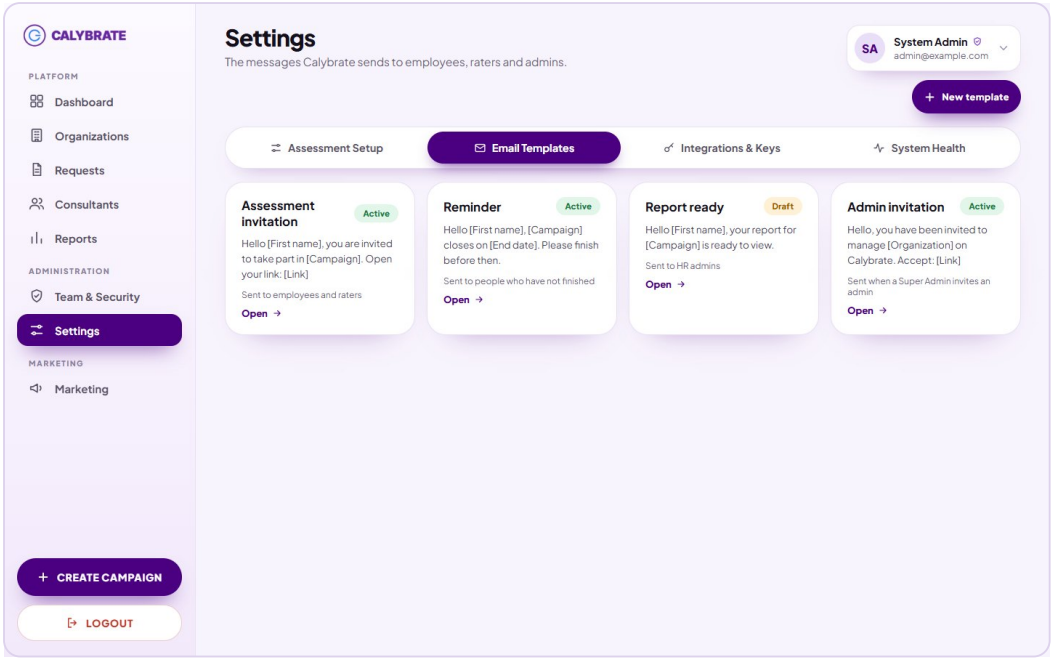

SUGGESTED

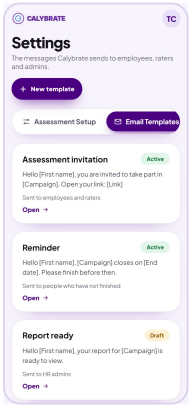

Integrations & Keys

- Connected services with masked keys and last-rotated date.
- AI summaries is flagged Needs review: confirm what employee data is sent.

Email Templates

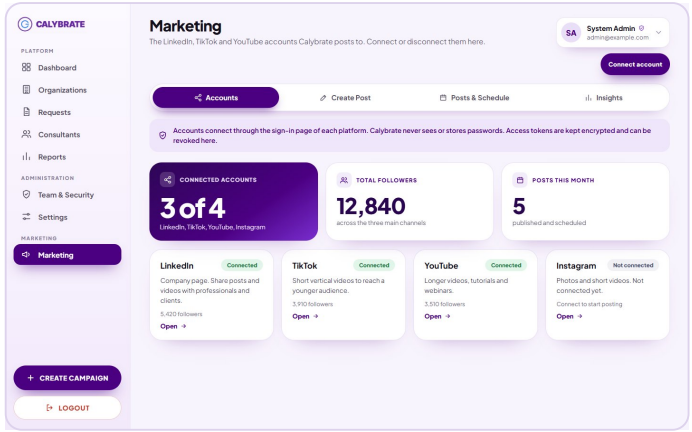

- Message templates with who receives each one.
- Admin invitation already exists in the live flow (Super Admin invites an Admin).

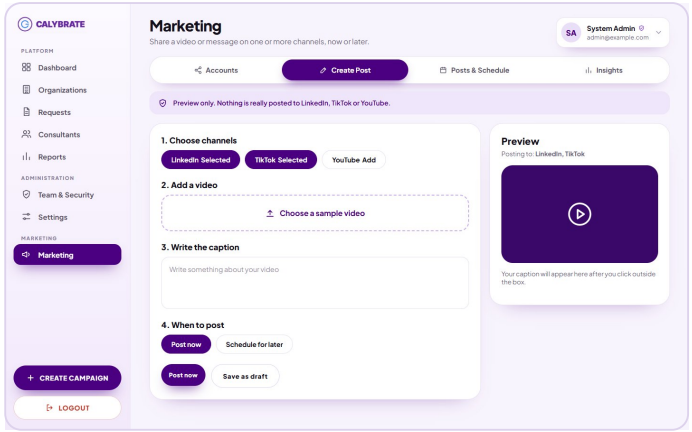

ON SCREEN

1 **Four tabs: Assessment Setup, Email, Integrations, Health** → 2 **Open a card for details**

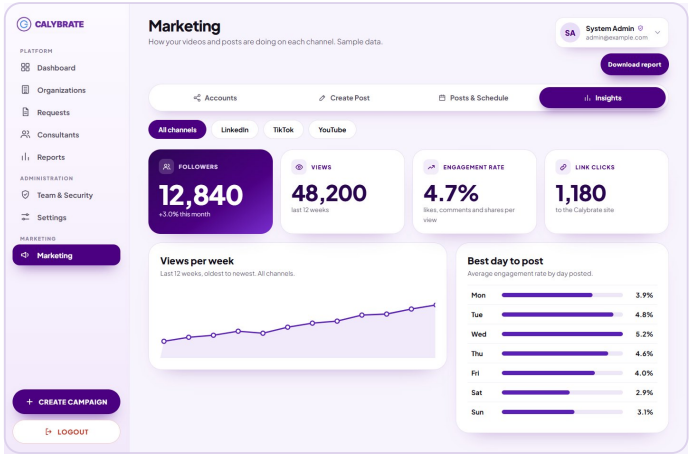

SUGGESTED

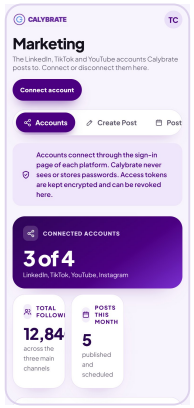

Accounts

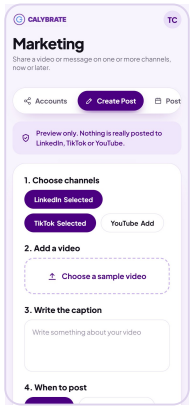

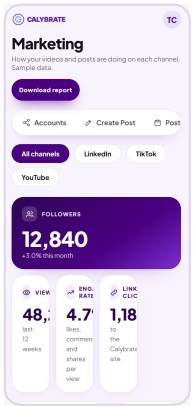

Create Post

Insights

ON SCREEN

1. Four tabs → 2. Steps 1 to 4 on Create Post → 3. Live preview on the right

- Posts & Schedule is the fourth tab; it was not in the screenshots. Everything here is preview only: nothing is really posted.

HIGH	**Pending count**	The Dashboard says 8 pending requests; the Requests page says 7 pending (and 7 + 10 + 3 = 20). One number must be right. A tile that links to the list makes it easy to check.
HIGH	**No confirmation**	Approve and Reject sit in a small menu and act at once. The redesign adds a visible Approve button and a confirmation popup; Reject offers a short reason (new).
MED	**Organization name lost**	Inside an organization the Employees tab title says Organization instead of the name. The redesign keeps the name in a header on all three tabs.
MED	**Duplicate people**	In the Employees tab the same person name appears several times with different emails. That may be real duplicates or test data; worth a check.
MED	**Active assessments**	The Dashboard shows 6,055 active assessments, while every campaign card shown has 0 employees and DRAFT status. It is not clear what is counted. The Recent Campaigns subtitle says active, yet all are drafts.
MED	**Create an organization**	The roadmap says only the SB (system) admin creates organizations (53), but this Organizations page has no Add organization button. Decide where that lives.
MED	**Create Campaign button**	The sidebar button is on every System Admin page. It is not clear which organization it creates for; ask for the organization first, or hide it.
MED	**Name of the role**	Your live page says System Admin; your prototype says Platform Admin (Calybrate team only). Use one name everywhere.
MED	**Sidebar length**	21 items is too many for one list. The sidebar plan page groups them into 8, with tabs for the rest.
LOW	**Consultants**	All show 0 total and 0 completed; one email ends .com.com; there is no remove button; the same first name appears four times.
LOW	**Naming**	The title says Admin Dashboard and the role is System Admin; the menu says Requests and the page says Culture Requests.
LOW	**Roadmap**	Matches 28 to 31 (culture request, email to SB Admin, personalised call and setup) and 53. Open: what happens after Approve, and who runs the personalised call.

NEW IN THE MOCKUPS (NOT ON THE LIVE PAGES)

Header with counts inside an organization, mini bars, status tabs, the visible Approve button, bulk select, the approve and reject popups, consultant cards and the Add Consultant dialog. Names and emails are examples. Sidebar, logo and labels are the live ones.
